

Audio Placeholder Setup Guide

Add your temporary or final audio clips into `Assets/Audio/` .

Recommended files:

- `music_gameplay_loop.wav`
- `sfx_player_shoot.wav`
- `sfx_enemy_shoot.wav`
- `sfx_player_hit.wav`
- `sfx_player_death.wav`
- `sfx_enemy_death.wav`
- `sfx_powerup.wav`

Setup in Unity

1. Select `AudioManager` object in `GamePlay` scene.
2. Ensure it has 2 AudioSources:
 - `SFX Source` (Play On Awake OFF)
 - `Music Source` (Play On Awake OFF)
3. In `AudioManager` inspector, assign clips:
 - `Gameplay Music Clip`
 - `Player Shoot Clip`
 - `Enemy Shoot Clip`
 - `Player Hit Clip`
 - `Player Death Clip`
 - `Enemy Death Clip`
 - `PowerUp Clip`

Import Settings Tips

- Load Type:
- SFX: `Decompress On Load`
- Music: `Streaming`
- Compression Format:
- WAV or OGG Vorbis both work

If no clips are assigned, gameplay still functions without audio errors.
