

Scene Setup Guide

1) MainMenu Scene

Create scene: `MainMenu`

Hierarchy (example):

- `Main Camera`
- `Canvas`
- `TitleText`
- `StartButton`
- `QuitButton`
- `MenuManager` (with `MenuManager.cs`)

Button wiring:

- `StartButton` -> `OnClick` -> `MenuManager.StartGame()`
- `QuitButton` -> `OnClick` -> `MenuManager.QuitGame()`

2) Gameplay Scene

Create scene: `GamePlay`

Hierarchy (example):

- `Main Camera` (orthographic)
- `BackgroundLayer1` (`SpriteRenderer` or `quad`)
- `BackgroundLayer2` (`SpriteRenderer` or `quad`)
- `ParallaxSystem` (`ParallaxBackground.cs`)
- `GameManager` (`GameManager.cs`)
- `SpawnManager` (`SpawnManager.cs`)
- `AudioManager` (`AudioManager.cs` + 2 `AudioSources`)
- `UIManager` (`UIManager.cs`)
- `MenuManager` (`MenuManager.cs`)
- `Player` (instance of `Player` prefab)
- `Canvas`
- `HUDRoot`
- `ScoreText`
- `HealthText`
- `WaveText`
- `RapidFireIndicatorText`
- `ShieldIndicatorText`
- `PauseMenuRoot` (set inactive initially)
- `Resume / Main Menu` buttons
- `GameOverRoot` (set inactive initially)
- `GameOverSummaryText`
- `Restart / Main Menu` buttons

3) Camera Setup

Recommended orthographic camera:

- Projection: Orthographic
- Size: ~5
- Position: (0, 0, -10)

4) Build Settings

File -> Build Settings -> Add Open Scenes

Order:

1. MainMenu
2. Gameplay

This order ensures app starts at menu.
