

Setup Guide (Unity Space Shooter)

This project is now self-contained and auto-configured.

1) Open in Unity

- Use **Unity 2022.3 LTS**.
- Open the repo root folder in Unity Hub.

2) Auto Content Generation

On first import, the editor script automatically ensures:

- Assets/Scenes/MainMenu.unity
- Assets/Scenes/GamePlay.unity
- Assets/Scenes/GameOver.unity
- Assets/Prefabs/*
- Assets/Sprites/*

If you need to regenerate manually:

- **Tools → Space Shooter → Regenerate Project Content**

3) Play

- Open Assets/Scenes/MainMenu.unity
- Press Play

4) Build Windows EXE

- File → Build Settings
- Add/verify scenes in this order:
 1. MainMenu
 2. GamePlay
 3. GameOver
- Platform: PC, Mac & Linux Standalone
- Target: Windows x86_64
- Build

5) Controls

- Move: WASD / Arrow keys
- Shoot: Space / Left Mouse Button
- Pause: Esc
